

# 0189 onion moisture probe

## **Sensor principle :**

Detection of water presence on onion stems by resistive measurements

## **Power supply**

Continuous voltage : 5V  
Consumption < 500  $\mu$ A

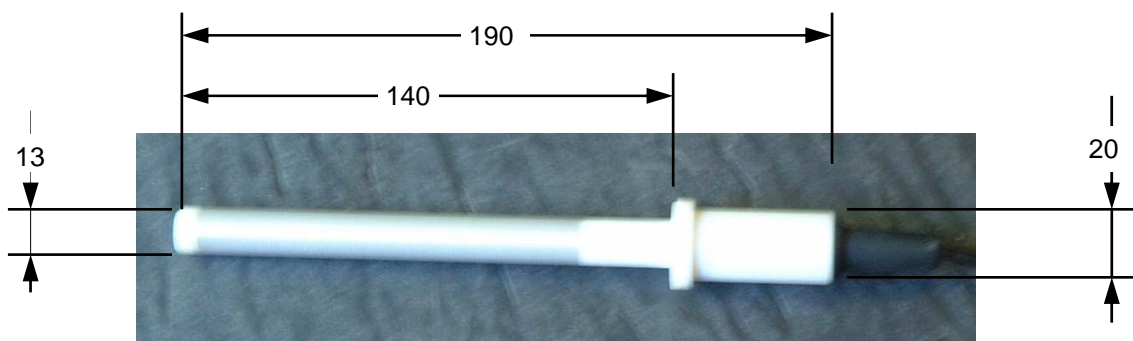

## **Using**

Digital output  
Dry state : 100%  
Wet state : 0%

## **Application**

Agrometeorology : Reasoned fight against onion mildiou and botrytis

## **Sizes**

48, rue de Versailles  
91400 Orsay

Phone : 01 64 46 34 10  
Fax : 01 64 46 25 22
