

0154 thermo-hygrometer

Digital sensor type "Plug&Play" allowing an automatic recognition of the probe characteristics by PULSIANE II weather station

TEMPERATURE

Meteorological characteristics

Range : -30°C to +50°C
Accuracy : ± 0.3°C

HYGROMETRY

Meteorological characteristics

Range : 0 to 100%
Using temperature : -40°C to +70°C
Accuracy : ± 3%
Resolution : 1%
Stability on 1 year : ± 1%
Response time : 15 s

Elaborated data by weather stations

Minimum,
Maximum,
Average
Freezing duration

Minimum,
Maximum,
Average
Humidity duration :
t>90%, 80%<t<90%, t<40%

Using

Under radiation shield

Maintenance

Calibration of the humidity probe each year
Yearly changing of the filter

Other characteristics

Sizes : Ø 18 x 85 mm
Weight : 20 g
Connection by RJ plug

48, rue de Versailles
91400 Orsay
